EarlySight

FOR SENIOR LEADERSHIP TEAMS

We can help you solve the data problems facing your team.

EarlySight takes the attendance, behaviour and report data your school already collects and turns it into a plain-English list of the pupils who need a conversation, and why.

Does this sound familiar?

The data is everywhere. The time to read it isn't.

Registers, behaviour logs, report grades and SEN lists all live in different places. Pulling them together falls to someone who already has a full-time job.

EarlySight brings them together for you.

By the time it shows up, it's late.

A termly attendance figure tells you a pupil has slipped. It doesn't tell you the slip started in Monday Maths six weeks ago.

EarlySight spots the change as it starts.

Averages hide the pupils.

"93% attendance" sounds healthy, but it says nothing about who has just dropped below 90%, or which class is struggling.

EarlySight names the pupils behind the number.

PROBLEM 1 · SPOTTED TOO LATE

Catch the change while it's still small.

Most worrying patterns don't start with a crisis. They start with one lesson missed here and a dip in effort there. EarlySight checks every pupil against their own record and their year group, and tells you in plain English when something has changed.

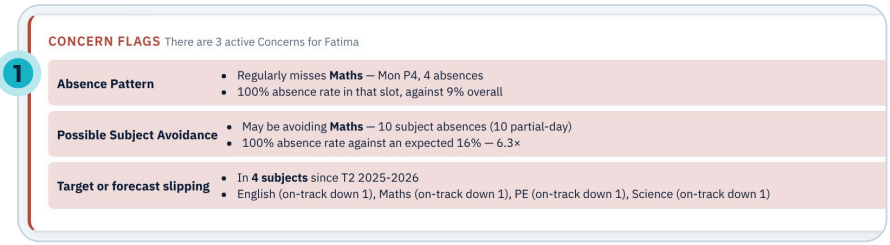

FATIMA, YEAR 11

90.9%

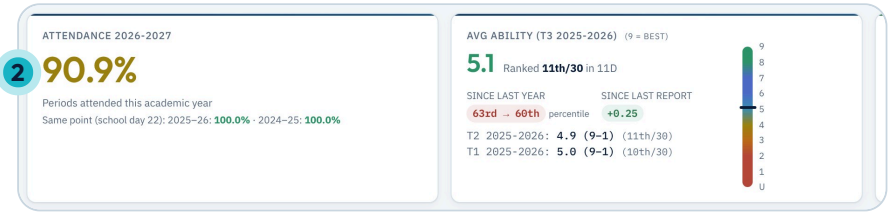

Her attendance this year. On a spreadsheet, that's nothing to worry about.

4 of 4

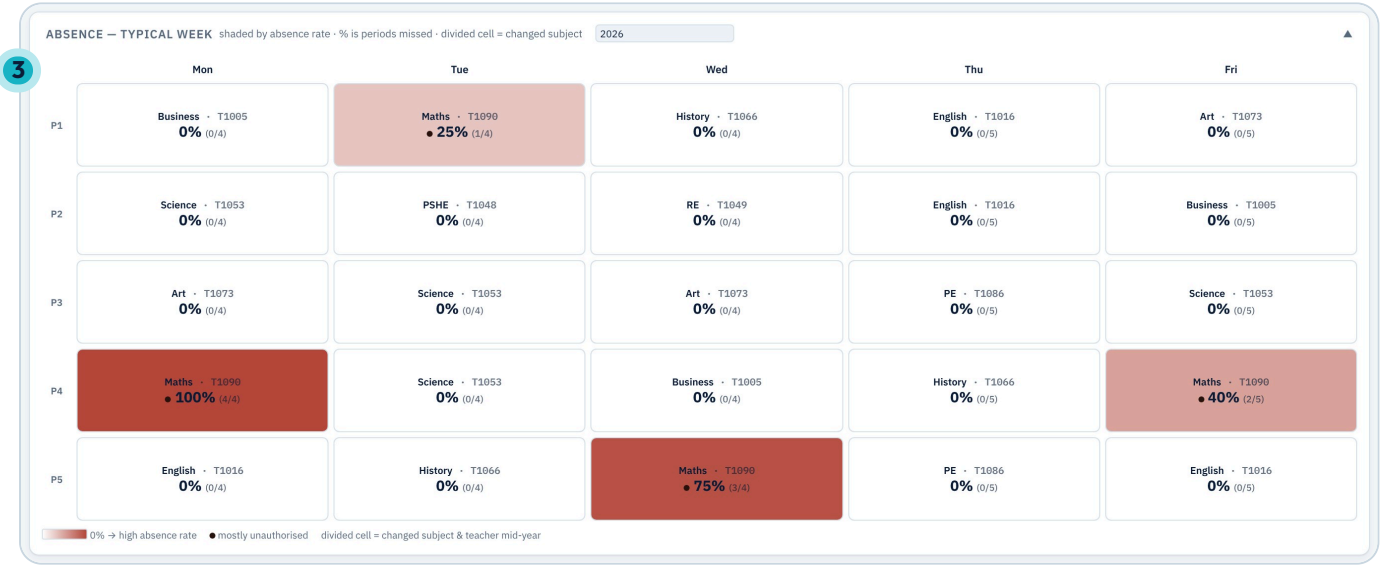

Monday period 4 Maths lessons missed this term, while she's in school for the rest of the day. EarlySight flags it as possible subject avoidance.

1 · Concern flags. Each one is written as a sentence, with the evidence underneath. Nobody has to interpret codes or percentages.

2 · The headline numbers, each compared with this point last year and with the rest of her form.

3 · Her typical week. Every lesson in the timetable, shaded by how often she misses it. The pattern is obvious at a glance: it's Maths, and only Maths.

A

Every pupil, every time the data updates

No one has to remember to run a report. The checks run whenever new data is uploaded.

B

Change, not just low numbers

A pupil who drops from 99% to 92% matters as much as one who has always been at 88%. EarlySight looks for both.

C

Mark it as considered

Once a concern has been looked at, one click records it, so the whole team can see it has been dealt with.

Spot the change, not just the number.

Screens show an invented demo school. No real pupil data is used.

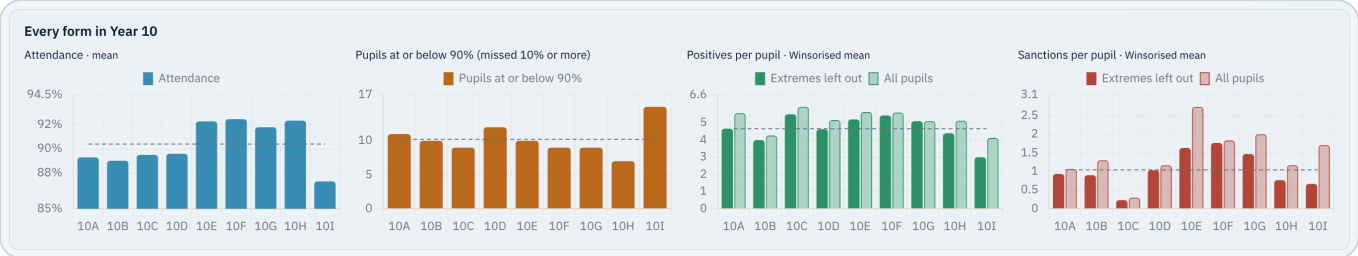

EarlySight

PROBLEM 2 · TOO MUCH TO LOOK AT, TOO LITTLE TIME

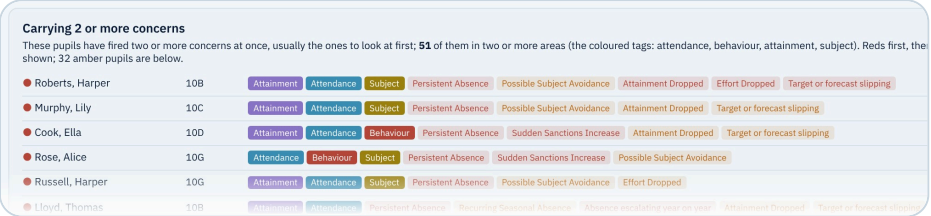

Give every leader their own starting point.

Year leaders and tutors don't need the whole school's data. They need to know where to start on Monday morning, so each person gets their own pupils, with the most pressing at the top.

Senior leaders · whole school | **Year leaders · their year** | **Form tutors · their form**

Year leader view. Every form in the year side by side: attendance, pupils below 90%, rewards and sanctions. The dashed line is the year average, so the form that needs support stands out.

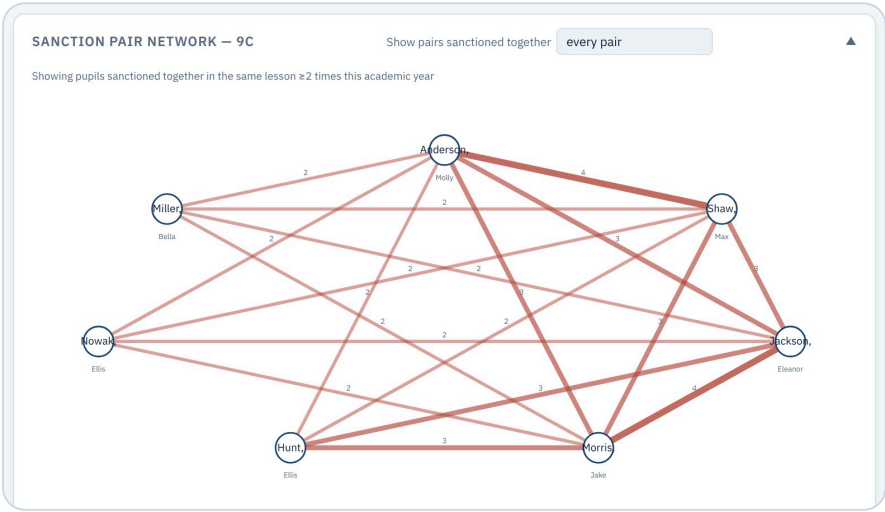

Carrying 2 or more concerns. The shortlist to start with: problems in several areas at once, tagged attendance, behaviour, attainment or subject.

> **"Who should I see first?" answered before the meeting starts.**

It's not always the pupil.

The Sanction Pair Network maps which pupils are sanctioned **in the same lesson**. In Form 9C, seven pupils form one tight web, almost all of it in History.

That History class has **28 behaviour codes** since September; the other Year 9 History classes have almost none. The conversation is about the room, not just one pupil.

Sanction Pair Network. Each line joins two pupils sanctioned in the same lesson; the thicker and darker the line, the more often it has happened.

HOW IT WORKS

1

Use what you already have

Upload the exports your school already produces. No new data entry for staff.

2

We build your dashboard

Set to your grading, your thresholds, and your school's colours and logo.

3

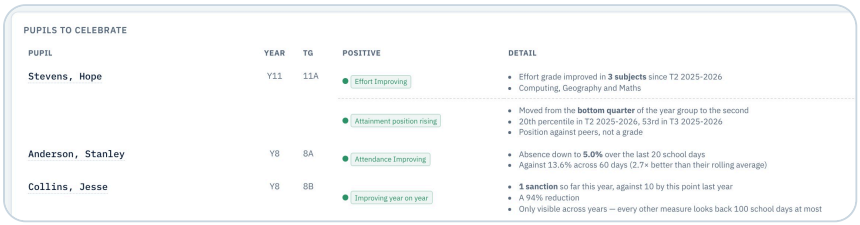

Your team signs in

Each person sees their own pupils, updated every time new data arrives.

PROBLEM 3 · SHOWING IT'S WORKING, FOR EVERY GROUP

See who's turning a corner, and who isn't.

Governors, Ofsted and your own team want to know whether your work is making a difference, especially for disadvantaged pupils and pupils with SEND. EarlySight tracks the improvements as well as the concerns, and puts every group side by side.

PUPILS TO CELEBRATE

PUPIL	YEAR	TG	POSITIVE	DETAIL
Stevens, Hope	Y11	11A	Effort Improving	• Effort grade improved in **3 subjects** since T2 2025-2026 • Computing, Geography and Maths
			Attainment position rising	• Moved from the **bottom quarter** of the year group to the second • 20th percentile in T2 2025-2026, 53rd in T3 2025-2026 • Position against peers, not a grade
Anderson, Stanley	Y8	8A	Attendance Improving	• Absence down to **5.0%** over the last 20 school days • Against 13.6% across 60 days (2.7× better than their rolling average)
Collins, Jesse	Y8	8B	Improving year on year	• **1 sanction** so far this year, against 10 by this point last year • A 94% reduction • Only visible across years — every other measure looks back 100 school days at most

Congrats. Pupils whose effort, attendance or behaviour is improving. Ready-made good news for assemblies, letters home and governors.

HOPE, YEAR 11

20th → 53rd

Her percentile in her year group from one report to the next, after support from April. Effort is up in three subjects.

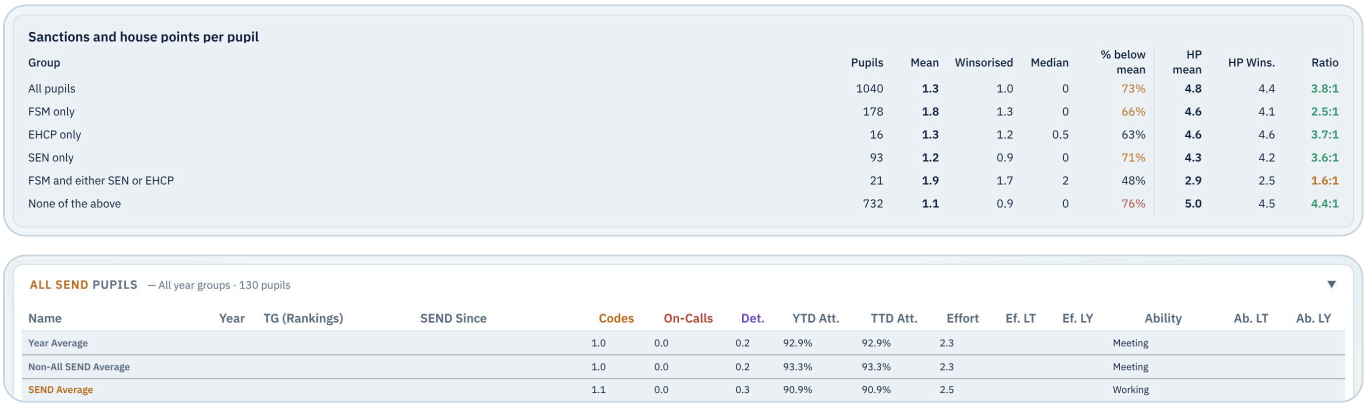

Turnarounds like this are easy to miss and praise. EarlySight lists them for you.

SEND and Free School Meals, side by side

1.6×
more behaviour sanctions for pupils on Free School Meals than for pupils with no FSM, SEN or EHCP

2.5 vs 4.4
house points per sanction: FSM pupils against those with no FSM, SEN or EHCP

90.9% vs 93.3%
attendance this year: pupils with SEND against those without

Sanctions and house points per pupil

Group	Pupils	Mean	Winsorised	Median	% below mean	HP mean	HP Wins.	Ratio
All pupils	1040	1.3	1.0	0	73%	4.8	4.4	3.8:1
FSM only	178	1.8	1.3	0	66%	4.6	4.1	2.5:1
EHCP only	16	1.3	1.2	0.5	63%	4.6	4.6	3.7:1
SEN only	93	1.2	0.9	0	71%	4.3	4.2	3.6:1
FSM and either SEN or EHCP	21	1.9	1.7	2	48%	2.9	2.5	1.6:1
None of the above	732	1.1	0.9	0	76%	5.0	4.5	4.4:1

ALL SEND PUPILS — All year groups · 130 pupils

Name	Year	TG (Rankings)	SEND Since	Codes	On-Calls	Det.	YTD Att.	TTD Att.	Effort	Ef. LT	Ef. LY	Ability	Ab. LT	Ab. LY
Year Average				1.0	0.0	0.2	92.9%	92.9%	2.3			Meeting		
Non-All SEND Average				1.0	0.0	0.2	93.3%	93.3%	2.3			Meeting		
SEND Average				1.1	0.0	0.3	90.9%	90.9%	2.5			Working		

The SLT and SEND Focus pages. Sanctions, rewards, attendance, effort and attainment for each group, so you can see whether gaps are opening or closing.

See what EarlySight could do for your team.

Book a walkthrough of the demo school, and we'll talk through how it would work with your own data.
